Guarding Against Key Compromise

Key Tagging Systems

Key Security & Compromise Protection

Eureka key tagging is a leading security solution for the identification of keys.

Designed to aid in the prevention of key compromise situations for secure environments, Eureka key tagging will ensure your keys receive round the clock monitoring and provide an extra level of security, control and protection.

Installed in a large number of prisons throughout the UK, our system provides establishments of any size and security category with an excellent level of key compromise protection.

Complete Service

When you choose Eureka key tagging we are able to offer a complete service to ensure you receive the best possible solution.

- Site survey
- Installation
- Customer Support
- Training
- Service & Maintenance

Robust & Proven

Using robust hardware and key tags, our system offers you a versatile and proven solution to meet your key protection requirements.

Improve Key Security

Identify and monitor your keys at any fixed exit point and key room. Prevent your keys from crossing a secure line and raise alarms when they are detected.

Hardware Choice

We offer a range of hardware options that can be flexibly put together to meet your needs and budget.

The Eureka Key Tag

Provides reliable operation, tough construction, ergonomically designed and offers a long operational life that includes a 3 year mechanical guarantee.

Optional Additions

Additional system capabilities are available using the Eureka key tagging software that provides monitoring and logging of keys.
