Road, Wimborne, Dorset, BH21 7ND

## Why ZoneSafe™?

- ▲ Safeguards personnel
- ▲ Helps prevent collisions
- ▲ Reduces site risk
- ▲ All round 360° detection
- ▲ Front & rear options
- ▲ Variable detection range
- ▲ Hands free operation
- ▲ Identifies pedestrians and obstacles
- ▲ Easy to operate
- ▲ Event recording
- ▲ Data download & analysis

## Make everyone visible...

Zonesafe™ is a proximity warning system which produces a 360° invisible detection zone around any heavy vehicle, machine or area.

Zonesafe™ provides companies with a solution to reduce workplace accidents and prevent collisions between vehicles and personnel working in close proximity.

## How is Zonesafe™ installed and utilised?

A vehicle or machine will be installed with detection equipment. Personnel working on the site wear a safety transponder that can be integrated into hi viz clothing and other PPE.

Safety isn't expensive, it's priceless.

## How does Zonesafe™ work?

Safety transponders worn by personnel are detected by the system when they enter a configurable detection zone. Entering the detection zone triggers an audible and or visual alarm, alerting the driver to the presence of a pedestrian transponder.

A key benefit of Zonesafe™ is its ability to record events such as system status and tag detections. Event logs from each vehicle can be downloaded, analysed and compared. Typical information available will show individual detections to help improve training methods and identify possible problem areas.

## Where can you deploy Zonesafe™

Zonesafe™ can be deployed on a number of vehicles across different types of work sites including construction, warehousing, materials handling, ports, rail, waste and quarries. System configuration can be customised to suit site requirements and different vehicles.

## Zonesafe™ advantages

- ▲ Uniquely identify pedestrians
- ▲ Improve driver & pedestrian awareness
- ▲ Data capture & logging
- ▲ Change employee behaviour
- ▲ Low through life cost
- ▲ Rental & lease options

## Zonesafe™ & other safety devices

Complimenting existing safety procedures and other safety devices, Zonesafe™ helps organisations prevent accidents between vehicles and pedestrians.
